The Bank's operating results are affected both positively and negatively by a set of events and situations, many of which are beyond its control, including, without limitation, the situation of the Panamanian and foreign economy, and interest rates in the United States.

The Bank's local corporate loan portfolio increased by $1.4 \%$ or U.S. $\$ 57.0$ million to U.S. $\$ 4,251.6$ million, and the Bank's regional corporate loan portfolio decreased by $0.7 \%$ or U.S. $\$ 7.4$ million to U.S. $\$ 1,024.9$ million. The Bank's total investments portfolio, made up of the Bank's primary liquid assets (comprised of cash, bank deposits and investment-grade, liquid, fixed-income investments), and its local and regional corporate fixed income portfolio, expanded by $9.2 \%$ from U.S.\$4,303.5 million in September 2017 to U.S.\$4,698.0 million in September 2018.

## Total Liabilities

The Bank's total client deposits grew by U.S. $\$ 375.0$ million or $3.4 \%$, from the prior-year period, to U.S. $\$ 11,532.0$ million. Client time deposits, the Bank's main source of funding, increased U.S.\$242.0 million to U.S.\$5,704.5 million, representing $49.5 \%$ of total client deposits as of September 30, 2018, with an average remaining life of 15.9 months, and $68.5 \%$ having original maturities of greater than one year. Savings accounts grew by U.S. $\$ 42.4$ million to U.S. $\$ 3,415.5$ million or $29.6 \%$ of total client deposits, while demand deposits increased U.S.\$90.6 million to U.S.\$2,412.0 million as of September 30, 2018.

In keeping with the Bank's financial policies, we have been able to develop and access medium- and long-term funding alternatives. As of September 30, 2018, the Bank's total medium- and long- term borrowings and placements grew by U.S. $\$ 328.4$ million, or $12.2 \%$, to U.S. $\$ 3,016.6$ million as compared to the same period in 2017.

During the last twelve months we have accessed various financing sources, among which the following are notable: (i) a U.S. $\$ 800$ million medium-term syndicated loan, whose funds were used to cancel in advance the financing of U.S. $\$ 500$ million agreed in 2015, due in May 2018, and (ii) in June 2018, the Bank increased the previously mentioned syndicated loan by U.S. $\$ 300$ million, among commercial banks in the United States, Europe, Asia, the Middle East and Latin America.

## Equity

As of September 30, 2018, the Bank's equity grew by $6.6 \%$, or U.S. $\$ 134.8$ million, from U.S. $\$ 2,053.9$ million in 2017 to U.S. $\$ 2,188.7$ million in 2018. This increase was driven by retained earnings of U.S. $\$ 132.7$ million, with the Bank retaining $55.20 \%$ of its net profits in the period. The Bank's solid capital base allowed it to absorb a 4.6\% asset growth, while maintaining healthy capitalization levels, with an equity to total assets ratio of $12.1 \%$ as of September 30, 2018, compared with $11.9 \%$ as of September 30, 2017.

## Liquidity and Funding

The Bank's Assets and Liabilities Committee (ALCO) is responsible for developing and proposing policies relating to the management of the Bank's assets and liabilities to enable it to maintain interest rate, market, maturity and liquidity, and foreign exchange exposures within the Bank's established limits while maximizing the return on shareholders' equity.

The Bank's asset and liability management policy seeks to ensure that sufficient liquidity is available to honor withdrawals of deposits, to make payments upon maturity of other liabilities, to extend loans or other forms of credit, and to meet working capital needs.

The treasury department is responsible for managing the Bank's liquidity and funding positions, as well as executing the Bank's investment strategy. The Bank's current policy requires high absolute levels of liquidity composed of high quality liquid assets, a key pillar of the Bank's financial strategy.

Consistent with the Bank's conservative financial policies, we have historically maintained high levels of liquidity in investment-grade liquid investments, which are complemented by: (i) an adequate asset and liability maturity structure, (ii) a diversified and stable base of deposits, (iii) medium- and long-term financing (representing 19.0\% of total liabilities), and (iv) low levels of short-term institutional liabilities ( $0.6 \%$ of total liabilities), all of which gives us a very stable asset and liability structure in the Bank's balance sheet.

The Bank's primary liquidity ratio, measured in terms of liquid assets (comprised of cash, bank deposits and investment-grade, liquid, fixed-income investments) to total deposits and borrowings, was $26.1 \%$ as of September 30, 2018, equivalent to U.S. $\$ 3,767.6$ million in primary liquidity. This represents an increase of $5.4 \%$, compared to U.S. $\$ 3,574.9$ million in 2017, with a liquidity ratio of $25.9 \%$. The Bank's total primary liquidity has an average credit rating of AA-, of which $52.3 \%$ are AAA rated investments. As of September 30, 2018, these liquid assets represented $32.7 \%$ of total deposits, and $20.9 \%$ of total assets.

In addition to its internal liquidity requirements, the Bank must comply with liquidity requirements established by the Superintendence of Banks of Panama (SBP), which require liquid assets of no less than $30 \%$ of selected deposits received, with maturities of less than 186 days, excluding subsidiaries and pledge deposits. For the calculation of this indicator, the SBP allows all loan installments and maturities classified as standard with a term of less than 186 days to be considered liquid assets, in addition to those used for the calculation of internal liquidity, for up to $30 \%$ of the total liquid assets used. As of September 30, 2018, the Bank maintained a regulatory liquidity of $38.6 \%$, complying with the requirements established by law.

## Loan Portfolio

The Bank's loan portfolio is well-diversified across clients, products and borrowers segments. As of September 30, 2018, total loans amounted to U.S. $\$ 11,846.1$ million, of which $44.5 \%$ was comprised of corporate loans ( $35.9 \%$ local corporate loans and $8.7 \%$ foreign corporate loans), $50.7 \%$ of retail loans (36.0\% residential mortgages and $14.7 \%$ consumer loans), and $4.8 \%$ in other loans (comprised of pledge loans, overdrafts, and financial leases).

In order to reduce the risk of credit losses, we emphasize the granting of loans secured by collateral, particularly single-family residences, properties and deposits, in addition to applying strict underwriting guidelines and "know your customer" policies. As of September 30, 2018, $79.7 \%$ of all loans were secured by properties or deposits in the Bank; $73.0 \%$ of all loans were secured by first lien mortgages on land and improvements (residential mortgages, commercial mortgages and interim construction loans), and $6.7 \%$ was backed by collateral at the Bank (secured loans and overdrafts). The combination of appropriate underwriting policies and high-quality guarantees has resulted in historically low levels of charge-offs, averaging $0.42 \%$ of total loans annually in the two years ended December 31, 2017.

As of September 30, 2018, $88.3 \%$ of the Bank's loan portfolio was placed with local clients, who are borrowers (individuals and corporations) established in Panama, and $11.7 \%$ was placed with regional clients based in Mexico, Colombia, Guatemala, El Salvador and Peru, and with our universal banking subsidiary in Costa Rica, Banco General (Costa Rica), S.A., which has 11 branches. As of September 30, 2018, 99.9\% of the Bank's loans were denominated in U.S. dollars, which is legal tender in Panama. The Bank segments its portfolios according to type of loan, economic activity, and income group, among other variables. In addition, the Bank's credit policies provide for managing concentration within economic sectors, in the case of corporate loans, and provide various underwriting criteria, depending on the level of income, in the case of retail lending.

The following table summarizes the composition of the loan portfolio by type of loan as of September 30, 2018 and 2017, and as of December 31, 2017, 2016, and 2015:

As of September 30, 2018, the Bank's loan portfolio maintained low levels of non-accrual and, past due loans, with levels of 0.94\% (September 2017: 0.88\%) and 1.29\% (September 2017: 1.08\%), respectively, of the total loan portfolio. As of September 30, 2018, the Bank's loan loss reserve coverage of past due loans was 100.25\% (September 2017: 114.58\%), and the coverage of non-accrual loans was 138.05\% (September 2017: 140.74\%); charge-offs amounted to U.S. $\$ 40.1$ million, or $0.45 \%$ (September 2017: 0.43\%) of total loans.

The Bank's charge-offs, which remained stable as compared to the prior-year period, stood at $0.53 \%$ of total loans in the quarter, as a result of the following factors: (i) the application of rigid and consistent granting policies over time; (ii) the Bank's preference to extend high-quality secured loans with collateral from residential and commercial properties, whose quality and value are carefully evaluated; and (iii) the diligent monitoring of the performance of loans, allowing for the adoption of appropriate measures to minimize losses.

## Non-Accrual Loans

The SBP requires the classification of a loan on non-accrual status if any of the following conditions exist: (i) principal and interest payments past due level has reached the limits established by the SBP (91 or more days of principal and/or interest payments past due for all loans, except for mortgages which cease accruing
interest after 120 days past due, and overdrafts after 30 days past due); or (ii) the debtor's financial condition, whether individual or corporate, has suffered material adverse effects (payment capacity deterioration, collateral weakness, and other factors known to us, such as fraud, death of the debtor, or personal or corporate bankruptcy) that puts our ability to collect the loan at risk.

The following table presents our non-accrual loans, according to loan type, as of September 30, 2018 and 2017, and as of December 31, 2017, 2016, and 2015:

## Allowance for Loan Losses

We have adopted IFRS 9, Financial Instruments with effect as of January 1, 2018. IFRS 9 replaced the "incurred loss" model of IAS 39 with an "expected credit loss" (ECL) model. Please refer to "Note 3h Summary of Significant Accounting Policies - Impairment of Financial Instruments" of the "Consolidated Financial Statements" as of September 2018 for more information on the adoption of IFRS 9.

Provisions for loan losses are accounted for as charges on income and added to the allowance for loan losses to maintain reserves at the required level. Any subsequent charge-offs are applied against this allowance.

The Bank's reserve levels have historically provided adequate coverage of non-accrual loans, amounting to $138.05 \%$ as of September 30, 2018. Additionally, the Bank's allowance for loan losses exceeds the requirements established by the SBP. As of September 30, 2018, the Bank's loan loss provision amounted to $1.30 \%$ of total loans.

The following table presents the breakdown of the allowance for loan losses as of September 30, 2018 and 2017, and as of December 31 2017, 2016, and 2015:

## Capital Resources

The cornerstone of our overall financial strategy is our strong capital position, which exceeds local and international regulatory requirements contained in the Basel Accords, that has supported our investment grade ratings, which we have held since 1997, from Fitch (BBB+/Stable) and Standard \& Poor's (BBB/Positive, with a Stand Alone Credit Profile Rating of BBB+ as of April 2018).

As of September 30, 2018, our total regulatory capital amounted to U.S.\$2,345.4 million, or $247.8 \%$ of the total minimum capital required (Tier I and Tier II capital). ## Total Other Income, Net

The $38.5 \%$ decrease in total other income, net for the three months ended September 30, 2018, primarily reflects the following factors:

## Fees and Commission Income, Net

The $1.1 \%$ increase in fees and commission income, net of commission expense for the three months ended September 30, 2018 was mainly due to: (i) an $8.7 \%$ increase in commission and fees related to credit and debit card operations, and (ii) an $8.1 \%$ increase in mutual fund and pension fund income. The increase in income was partially offset by a $9.1 \%$ increase in commission and other expenses, mainly attributable to a $10.3 \%$ increase in credit and debit card commissions.

## Insurance Premiums, Net

Net insurance premiums, increased by $11.8 \%$, in the three months ended September 30, 2018, as compared to the same period in 2017, primarily a result of higher premiums on life insurance coverage from the Bank's growing residential mortgage, credit cards, and personal loan portfolios, as compared to the same period in 2017.

## (Loss) gain on Financial Instruments, Net

The loss on financial instruments, net, of U.S. $\$ 1.0$ million for the three months ended September 30, 2018, as compared to a gain of U.S. $\$ 10.9$ million in 2017 , was principally due to the decrease in the market values of fixed income instruments as a result of the increase in U.S. interest rates.

## Other Income, Net

Other income, net decreased by $72.8 \%$ or U.S. $\$ 17.1$ million in the three months ended September 30, 2018, as compared to the same period in 2017, because the third quarter of 2017 results benefited from a nonrecurring gain of US \$ 18.4 million from property sales related to the transfer to the bank's new 32 thousand square meter Operations Center.

## General and Administrative Expenses

The following table presents the Bank's principal general and administrative expenses for the three and nine months ended September 30, 2018 and 2017:

|  | For the Three Months Ended September 30 |  |  | For the Nine Months Ended September 30 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2018 | 2017 | \% Change | 2018 | 2017 | \% Change |
|  | (in thousands of U.S. dollars, except for percentages) |  |  |  |  |  |
| Salaries and other employee expenses | 43,846 | 42,088 | 4.2\% | 129,036 | 123,424 | 4.5\% |
| Depreciation and amortization | 6,290 | 6,861 | -8.3\% | 18,065 | 16,009 | 12.8\% |
| Premises and equipment expenses | 6,045 | 5,986 | 1.0\% | 19,252 | 18,618 | 3.4\% |
| Other expenses | 17,963 | 17,854 | 0.6\% | 52,879 | 51,412 | 2.9\% |
| Total | 74,144 | 72,789 | 1.9\% | 219,232 | 209,463 | 4.7\% |

The $1.9 \%$ increase in general and administrative expenses primarily reflects the growth of the Bank's business, with an increase of $3.9 \%$ in the loan portfolio and $4.5 \%$ in deposits and financings, as well as the following:

## Salaries and Other Employee Expenses

Salaries and other employee expenses represented $59.1 \%$ of total general and administrative expenses for the three months ended September 30, 2018 as compared to $57.8 \%$ for the same period in 2017. The $4.2 \%$ increase in salaries and other employee expenses was primarily attributable to the combination of a moderate annual increase in salaries which are typically in the range of $3 \%$ to $5 \%$, and a $2.2 \%$ increase in the number of employees.

## Depreciation and Amortization Expense

Total depreciation and amortization expense of U.S. $\$ 6.3$ million decreased by U.S. $\$ 0.6$ million, or $8.3 \%$ for the three months ended September 30, 2018, primarily due to a US $\$ 1.1$ million extraordinary charge for the termination of an IT initiative and moving expenses amounting to U.S.\$0.9 million, caused by the move of operations to our new operating center registered during the third quarter of 2017. The above decrease was offset by a U.S. $\$ 1.4$ million increase in depreciation and amortization associated with our Operating Center, which was inaugurated in 2017.

## Premises and Equipment Expenses

Premises and equipment expenses for the three months ended September 30, 2018 are in line with the same period in 2017.

## Other Expenses

Other expenses for the three months ended September 30, 2018 are in line with the same period in 2017.

## Taxes

Income tax, net amounted to U.S. $\$ 15.8$ million in the three months ended September 30, 2018 as compared to U.S. $\$ 14.6$ million in the prior-year period, as a result of a similar taxable income level.

## Operating Efficiency

The Bank's operating efficiency was $35.00 \%$ for the three months ended September 30, 2018, as compared to $32.21 \%$ in the same period in 2017, principally as a result of lower revenues in 2018 caused by a loss on financial instruments amounting to U.S. $\$ 1.0$ million compared to a gain of U.S. $\$ 10.9$ million in 2017, and the non- recurring gain of U.S.S $\$ 18.4$ million on property sold in the same quarter of 2017. The Bank's general and
administrative expenses, as a percentage of average assets improved slightly to $1.64 \%$ in the quarter, as compared to $1.70 \%$ in the same period in 2017.
