## General Information

Banco General, S.A., is a corporation organized and existing under the laws of Panama. The Bank operates in Panama under a General License issued by the Superintendence of Banks of Panama ("SBP"), which entitles it to carry out banking business with local and foreign clients. The Bank also conducts banking business in Costa Rica, through its subsidiary, Banco General (Costa Rica), S.A., and in Colombia, Guatemala, El Salvador, Mexico and Peru through representative offices. All references to "we," "us," "our," the "Bank" and "Banco General" are to Banco General, S.A. and its consolidated subsidiaries, unless otherwise indicated or the context otherwise requires, its consolidated subsidiaries.

The following discussion is based on information contained in the audited consolidated financial statements, as of December 2021. Some figures (including percentages) in this document have been rounded.

The Bank prepares its consolidated financial statements in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

## Panamanian Government and the Superintendence of Banks Response to COVID-19

In response to the economic and social impact of the COVID-19 pandemic, in an effort to safeguard the public health and preserve the stability and soundness of the financial system, the Government of Panama, from March 2020 to December 2021, adopted a series of protective measures and actions, including temporary closure of certain businesses and industries and mandatory confinement of the population during different extended periods. Similar actions have been adopted by governments in the other countries where the Bank operates.

To preserve the health and stability of the financial system, the Superintendency of Banks of Panama issued Agreement No. 02-2020 (March 16, 2020) as subsequently amended and subrogated to date, to create a temporary regulation for loans classified as "Modified Loans". The new regulations also allowed banks to evaluate and consider possible financial relief for loans granted to individual and commercial clients whose payment capacity was affected by the measures of confinement and temporary closures. To provide temporary financial relief banks deferred contractual interest and/or principal payments, and amended terms and conditions of loans, at the request of the borrower or at the Bank's initiative, without being considered a restructured loan up to June 30, 2021. The new terms and conditions of Modified Loans must consider financial feasibility criteria based on the borrower's capacity to pay and the bank's credit policies.

On June 11, 2021, the SBP issued Agreement No. 02-2021 that subrogates Agreement No. 02-2020 and its amendments and establishes the parameters and guidelines that are applicable to the "Modified Loans" as of July 1, 2021. The provisions of this agreement are intended to establish guidelines and parameters for credit and counterparty risk management of Modified Loans. Moreover, this agreement establishes that: (i) loans that are not paid in accordance with their existing terms, advance in delinquency, (ii) loans that were modified after July 1, 2021, for regulatory purposes, will be categorized as subnormal modified loans, and (iii) debtors impacted by the pandemic were responsible for contacting their bank to reach an agreement to retake and/or restructure their obligations, no later than September 30, 2021, which the SBP later extended.

As banking flexibility measures were narrowed Agreement No. 02-2021 was amended by Agreement No.03-2021, which establishes that after July 1, 2021, modified normal and modified subnormal loans, upon meeting their payments for six consecutive months, will be reestablished to the normal loan classification according to Agreement No. 04-2013; while subnormal modified loans, in case of noncompliance for 91 days or more, will be reclassified, for regulatory purposes, as subnormal and restructured loans in accordance with Agreement No. 04-2013.

On December 22, 2021, the SBP issued Agreement No. 06-2021 which establishes the parameters and guidelines for determining the provisions applicable to credits classified as Modified Special Mention. This agreement repealed the additional regulatory generic provision of three percent (3\%) for the modified loan portfolio. Moreover, Agreement No. 06-2021, establishes that banks must ensure the compliance with the International Financial Reporting Standards (IFRS) models, as well as the standards established in Agreement No. 06-2021, including: (i) the recognition of a significant increase in credit risk for certain categories of modified loans, and (ii) banks cannot reverse provisions previously constituted as of November 2021 for the modified loan portfolio.

## I. ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## Total Assets

As of December 31, 2021, the Bank's gross loan portfolio decreased 1.3\% from US\$11,444.4 million in December 2020, to US $\$ 11,297.8$ million in December 2021. During this period, the Bank's residential mortgage portfolio grew $2.6 \%$, from US $\$ 4,595.5$ million to US $\$ 4,713.8$ million; the consumer loan portfolio decreased $3.1 \%$, from US $\$ 1,771.5$ million to US $\$ 1,717.0$ million; and the corporate loan portfolio, comprised of both local and regional corporate clients, decreased $6.4 \%$, from US $\$ 4,631.8$ million to US $\$ 4,454.3$ million, and other loans (comprised of pledge loans, overdrafts and financial leases) decreased from US $\$ 445.7$ million to US $\$ 412.7$ million. During the year, the Bank's local corporate loan portfolio decreased $10.0 \%$, from US $\$ 3,683.8$ million to US $\$ 3,315.2$ million, and the Bank's regional corporate loan portfolio increased $8.1 \%$, from US $\$ 947.9$ million to US $\$ 1,024.6$. The Bank's total investment portfolio primarily made up of investment-grade liquid fixed-income investments and its local and regional corporate fixed-income portfolio increased $9.8 \%$, from US\$5,646.5 million in December 2020 to US\$6,200.2 million in December 2021.

## Total Liabilities

The Bank's total client deposits grew by US\$355.3 million, or $2.6 \%$ from US $\$ 13,443.2$ million in December 2020 to US $\$ 13,798.5$ million in December 2021. Client time deposits, the Bank's main source of funding, decreased by US $\$ 324.2$ million, from US $\$ 5,994.4$ million to US $\$ 5,670.1$ million, representing $41.1 \%$ of total client deposits as of December 31, 2021, with an average remaining life of 18 months, and $71 \%$ having original maturities of more than one year. Savings accounts grew by US $\$ 495.4$ million or $11.1 \%$, from US $\$ 4,470.0$ million to US $\$ 4,965.4$ million representing $36.0 \%$ of total client deposits. Demand deposits increased by US $\$ 184.2$ million from US $\$ 2,978.8$ million to US $\$ 3,163.0$ million, representing 22.9\% of client deposits. This increase was primarily driven by a $16.8 \%$ growth in our customer base and the elevated usage of the Bank's digital platforms.

The Bank's total borrowings and placements decreased by US\$0.5 million, from US\$1,294.1 million in December 2020 to US $\$ 1,293.6$ million in December 2021. As of December 31, 2021, 30.9\% or US $\$ 400.0$ million of the Bank's financial debt are subordinated perpetual AT1 bond issued in May 2021.

## Equity

The Bank's equity grew by $2.2 \%$, or US $\$ 57.8$ million, from US $\$ 2,633.2$ million in December 2020 to US $\$ 2,691.0$ million in December 2021, mainly driven by an increase of US $\$ 143.2$ million in retained earnings, with the Bank retaining $35.08 \%$ of net income during this period, partially offset by a decrease of US $\$ 86.0$ million in capital reserves. The Bank's equity to total assets ratio increased from 14.14\% in December 2020 to 14.33\% in December 2021.

## A. Liquidity and Funding Sources

The Bank's Assets and Liabilities Committee ("ALCO") is responsible for developing and proposing policies relating to the management of the Bank's assets and liabilities that enable us to maintain interest rate, market, maturity and liquidity, and foreign exchange exposures, within the Bank's approved limits while maximizing the return on shareholders' equity.

The Bank's asset and liability management policy seeks to ensure that sufficient liquidity is available to honor withdrawals of deposits, to make payments upon maturity of other liabilities, to extend loans or other forms of credit, and to meet the working capital needs.

Our Treasury Department is responsible for managing the Bank's liquidity and funding positions, as well as executing the Bank's investment strategy. The Bank's current policies require high absolute levels of liquidity composed of highquality liquid assets, a key pillar of the Bank's financial strategy.

Consistent with the Bank's conservative financial policies, we have historically maintained high levels of liquidity in investment-grade liquid investments, which are complemented by: (i) an adequate asset and liability maturity structure, (ii) a diversified and stable deposit base, (iii) access to medium and long-term financing (representing $8.0 \%$ of total liabilities);
and (iv) low levels of short-term institutional liabilities, all of which gives us a stable asset and liability structure in the Bank's balance sheet.

Primary liquidity increased $21.3 \%$ to US $\$ 5,179.5$ million ( 2020 : US $\$ 4,270.9$ million) and the liquidity ratio increased to $35.25 \%$ (2020: $29.40 \%$ ). The Bank's primary liquidity ratio, measured in terms of liquid assets comprised of cash, bank deposits and investment-grade, liquid, fixed-income investments, divided by the total deposits and borrowings. The Bank's total primary liquidity has an average credit rating of AA-, of which $48.8 \%$ are AAA rated investments. As of December 31, 2021, these liquid assets represented $37.5 \%$ of total customer deposits and $27.6 \%$ of total assets.

In addition to our internal liquidity requirements, the Bank must comply with liquidity rules established by the SBP, which require banks to have liquid assets of no less than $30 \%$ of qualified deposits, with maturities of less than 186 days, excluding subsidiaries and pledge deposits. For the calculation of this indicator, the SBP allows all loan installments and maturities classified as standard with a term of less than 186 days to be considered liquid assets. The loan installments and maturities can only account up to $30 \%$ of the total liquid assets used in this indicator. As of December 31, 2021, the Bank maintained a regulatory liquidity of $44.84 \%$ as compared to $40.45 \%$ in December 2020, complying with the requirements established by law.

## Loan Portfolio

The Bank's loan portfolio is well diversified among client's segments and a wide variety of products. As of December 31,2021 , total gross loans amounted to US $\$ 11,297.8$ million comprised by: (i) $56.9 \%$ retail loans ( $41.7 \%$ residential loans and $15.2 \%$ consumer loans), (ii) $39.4 \%$ is made up of corporate loans ( $30.3 \%$ of local corporate loans and $9.1 \%$ of foreign corporate loans), and (iii) $3.7 \%$ of other loans (comprising of pledge loans, overdrafts and financial leases).

To minimize the risk of credit losses, we emphasize the granting of loans secured by collateral, particularly single-family residences, properties, and deposits, in addition to applying strict underwriting guidelines and "know your customer" policies. As of December 31, 2021, $77.0 \%$ of all loans were secured by residential or commercial properties, deposits, or other financial assets; $72.6 \%$ of all loans were secured by first lien mortgages on land and improvements (residential mortgages, commercial mortgages and interim construction loans), and $4.4 \%$ of all loans were backed by pledged deposits, and other financial assets. The combination of sound underwriting policies and security interests held as collateral resulted in historically low gross write-offs levels, averaging $0.79 \%$ of total loans for the last two years ending in December 31, 2021.

As of December 31, 2021, $88.8 \%$ of the Bank's loan portfolio was comprised of local borrowers (individuals and corporations) based in Panama, and $11.2 \%$ was comprised of regional clients based primarily in Costa Rica, Mexico, Colombia, Guatemala, El Salvador and Peru, including clients of our universal banking subsidiary in Costa Rica, Banco General (Costa Rica), S.A., which has 8 branches. As of December 31, 2021, 99.9\% of the Bank's loans were denominated in US dollars, which is the legal tender in Panama. The Bank classifies its portfolios according to type of loan, economic activities, and income group, among other variables. In addition, the Bank's credit policies provide for managing concentration within economic sectors, in the case of corporate loans, and provide various underwriting criteria, depending on the level of income, in the case of retail lending

The following table summarizes the composition of the loan portfolio by type of loan as of December 31, 2021, 2020 and 2019, respectively:

## Non-accrual Loans

SBP regulations require the classification of loans in a non-accrual status if any of the following conditions exist: (i) principal and interest payments exceed past due limits established by the SBP (91 days or more of principal and/or interest payments past due for all types of loans, except for mortgage loans and overdrafts which have a limit of 120 and 30 days, respectively); or (ii) the debtor's financial condition has been adversely affected (including by deterioration of the payment capacity, collateral weakness, and other factors known to us, such as fraud, death of the debtor, insolvency or bankruptcy) in a manner that places the collection of the loan at risk.

The following table presents non-accrual loans, according to loan type, as of December 31, 2021, 2020 and 2019, respectively:

Non-accrual loans reported to the SBP increased to US\$339.5 million as of December 31, 2021, from US $\$ 166.6$ million as of December 31, 2020. The US $\$ 172.9$ million, or $103.8 \%$ increase is primarily attributed to the end of the banking flexibility regulation. Starting on July 1, 2021, loans that do not meet their agreed terms advance in delinquency. The increase in non-accrual loans is mainly attributable to: (i) a US $\$ 125.5$ million increase in the residential and preferential mortgage non-accrual balance from US\$110.6 million, or $0.97 \%$ of the total loan portfolio, to US\$236.1 million or 2.09\% of the total loan portfolio; (ii) a US\$34.2 million increase in the consumer loans non-accrual balance, from US\$12.7 million, or $0.11 \%$ of the total loan portfolio, to US $\$ 46.9$ million or $0.41 \%$ of the total loan portfolio; and (iii) an increase of US $\$ 13.2$ million in corporate loans from US $\$ 43.4$ million, or $0.38 \%$ of the total loan portfolio, to US $\$ 56.6$ million, $0.49 \%$ of total loans.

Non-accrual loans in accordance with SBP regulations represented $3.01 \%$ of total loans as of December 31, 2021, compared to $1.46 \%$ as of December 31, 2020. The Bank's total allowance coverage for loan losses was $137.75 \%$ of non-accrual loans, as compared to $230.33 \%$ as of December 31, 2020.

As a result of the situation caused by COVID-19, the Bank approved and applied an exceptional and voluntary complementary policy for non-accrual consumer and corporate loans. This policy is based on analyzing a combination of factors, in addition to delinquency, such as the debtor's employment status, the economic activity of the employer, the collateral of the loan, the customer's internal credit risk category, and the number of deferred payments granted, among others. This policy may be suspended by the Bank's management at any time. Loans in non-accrual status in accordance with the provisions of this complementary policy applied by the Bank amounted to US\$107.4 million as of December 31, 2021 compared to US\$279.6 million as of December 31, 2020.

## Past Due Loans

The Bank classifies the loans in its portfolio, as past due: (i) during the life of the loan, if schedule interest and/or principal payments are more than 90 days past due; and (ii) at the final maturity of the loan, if all amounts due are not paid after 30 days of the final maturity date.

The following table presents past due loans, according to loan type, as of December 31, 2021, 2020 and 2019, respectively:

| As of December 31 |  |  | (\%) Change |

Past due loans increased to US\$381.1 million as of December 31, 2021, compared to US $\$ 176.0$ million as of December 31, 2020. The US $\$ 205.1$ million, or $116.5 \%$ increase in past due balances was principally attributable to the end of the banking flexibility regulation. Starting on July 1, 2021, loans that do not meet their terms advance in delinquency. The increase in past due loans is mainly attributable to: (i) a US $\$ 156.3$ million increase in the residential and preferential mortgage past due balance from US $\$ 122.9$ million or $1.07 \%$ of the total loan portfolio, to US\$279.2 million or $2.47 \%$ of the total loan portfolio, (ii) a US $\$ 37.7$ million increase in the consumer loans past due balance from US\$9.5 million or $0.08 \%$ of the total loan portfolio, to a US $\$ 47.2$ million or $0.41 \%$ of the total loans portfolio, and (iii) a US $\$ 11.1$ million increase in the corporate past due balance from US $\$ 43.7$ million or $0.38 \%$ of the total loan portfolio, to US $\$ 54.8$ million or $0.48 \%$ of the total loan portfolio.

Past due loans represented 3.37\% of total loans as of December 31, 2021, compared to $1.54 \%$ as of December 31, 2020. As of December 31, 2021, the Bank's total allowance coverage for loan losses was $122.72 \%$ of past due loans, as compared to $218.01 \%$ as of December 31, 2020.

## Allowance for Loan Losses

Provisions for loan losses are accounted for as charges on income and added to the allowance for loan losses to maintain reserves at the required level. Any subsequent write-offs are applied against this allowance.

The allowance for loan losses at amortized cost consists of expected credit losses (ECL) based on the loans' credit risk rating and the mechanisms used to determine the loans' probability of default depending on the impairment stage assigned to each loan. The ECL model is determined by grouping loans with similar credit risk characteristics, and segmented methodologies for "Consumer Banking" and "Corporate Banking". Both methodologies consist on probability of default, loss given default, and exposure to default estimates.

The expected credit loss (ECL) model presents three stages of impairment for financial assets that are applied from the date of origin or acquisition. These stages are summarized below:

Stage 1: The Bank recognizes a credit loss allowance at an amount equivalent to 12-month expected credit losses. This represents the portion of lifetime expected credit losses resulting from default events that are possible within a 12months period from the reporting date if credit risk has not increased significantly since initial recognition.

Stage 2: The Bank recognizes a credit loss allowance at an amount equal to the total lifetime expected credit losses (LTECL) for those financial assets which are considered to have experienced a significant increase in credit risk since their initial recognition. This requires the calculation of ECL based on the asset's remaining lifetime probability of default (LTPD). The allowance for credit losses are higher in this stage because of the increase in credit risk and the impact of a longer time horizon in comparison with the 12 months in stage 1.

Stage 3: The Bank recognizes a loss allowance at an amount equal to the expected credit loss during the total lifetime of the asset, based on a probability of default (PD) of $100 \%$ over the asset's recoverable cash flows.

Our IFRS 9 models and the data used to estimate expected credit losses in the consumer, mortgage and corporate portfolio, and thus set adequate levels of loan loss reserves may not be able to fully capture all the potential additional levels of risk resulting from the effects of the COVID-19 pandemic, which has resulted in a reduction of economic growth, reduced levels of actives in the business sector, and higher levels of unemployment. Therefore, the Bank has developed complementary models and estimates to incorporate the potential increase in levels of risk and the corresponding levels of additional loan loss reserves required.

The following table presents the breakdown of the allowance for loan losses under IFRS 9 parameters as of December 31, 2021, and December 31, 2020:

|  | December 31, 2021 |  |  | December 31, 2020 |  |  | (\%) Change |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Loans | Allowances | \% | Loans | Allowances | \% | Loans | Allowances |
|  | (in thousands of U.S. dollars,except percentages) |  |  |  |  |  |  |  |
| Stage 1 | 9,142,660 | 197,389 | 2.2\% | 10,133,492 | 225,723 | 2.2\% | -9.8\% | -12.6\% |
| Stage 2 | 1,474,043 | 129,813 | 8.8\% | 846,056 | 71,959 | 8.5\% | 74.2\% | 80.4\% |
| Stage 3 | 681,076 | 140,504 | 20.6\% | 464,875 | 86,113 | 18.5\% | 46.5\% | 63.2\% |
| Total | 11,297,779 | 467,706 | 4.1\% | 11,444,423 | 383,795 | 3.4\% | -1.3\% | 21.9\% |

The allowance for loan losses was increased to US $\$ 467.7$ million in December 2021, or $4.14 \%$ of the total loan portfolio, from US $\$ 383.8$ million, or $3.35 \%$ of the total loan portfolio, as of December 31, 2020.

Stage 1 loans decreased US\$990.8 to US\$9,142.7, and the level of the reserve decreased from US\$225.7 million (2.2\% of loans) in December 2020 to US $\$ 197.4$ million ( $2.2 \%$ of loans) in December 2021. Stage 2 loans increased from US $\$ 846.1$ million to US $\$ 1,474.0$ million, and the allowance level increased from US $\$ 72.0$ million ( $8.5 \%$ of loans) to US $\$ 129.8$ million ( $8.8 \%$ of loans). Stage 3 loans increased from US $\$ 464.9$ million to US $\$ 681.1$ million and the allowance level increased from US $\$ 86.1$ million ( $18.5 \%$ of loans) to US $\$ 140.5$ million ( $20.6 \%$ of loans).

The increments described above for Stages 2 and 3 are mainly attributable to the migration of Stage 1 residential mortgage loans (that were previously deferred as per Agreement No. 02-2020, as amended), as a result of the higher level of credit risk present, which resulted in such loans requiring amendments to the amortization terms and therefore classified as restructured under IFRS 9.

As of December 2021, the Bank's total restructured loans amounted to US $\$ 1,108.6$ million (US\$218.8 million in 2020) of which US $\$ 990.0$ million (US $\$ 129.2$ million in 2020) were backed by mortgage collateral (US $\$ 737.0$ million in residential mortgage loans, US $\$ 242.4$ million in commercial mortgage loans, and US $\$ 10.6$ million in interim construction loans). This increase was mainly due to the reclassification of residential mortgage loans that were previously deferred in accordance with Agreement No. 02-2020, as amended.

As a complement to our regular write-off policies, which are based primarily on the number of days of delinquency, and, as a result of the situation caused by COVID-19, the Bank approved and applied a complementary, exceptional, and voluntary write-off policy for consumer loans that were deferred repeatedly and demonstrated a weaker financial position and limitation to pay. This policy is based on analyzing a combination of factors, in addition to delinquency, such as the debtor's employment status, the economic activity of the employer, the loans collateral, the customer's internal credit risk category, and the number of deferred payments granted. This exceptional policy may be suspended by the Bank's management at any time.

As of December 31, 2021, total write-offs amounted to US\$97.0 million ( $0.86 \%$ of total loans), as compared to US\$83.2 million ( $0.73 \%$ of total loans) for the same period in 2020.

## B. Capital Resources

The cornerstone of our overall financial strategy is our strong capital position, which exceeds local and international regulatory requirements contained in the Basel Accords, that has supported our investment grade ratings since 1997, currently holding the following ratings BBB by Standard \& Poor's, Baa2 by Moody's, and BBB- by Fitch Ratings.

As of December 31, 2021, the Bank's total regulatory capital amounted to US\$3,029.2 million, or 2.84 times the total regulatory capital required by the SBP of $8.0 \%$. The ratio of total capital to risk-weighted assets was $22.75 \%$, calculated on a Tier I capital of US $\$ 3,029.2$ million over total risk weighted assets of US $\$ 13,315.1$ million. Total risk-weighted assets include US $\$ 11,506.1$ million of risk-weighted assets in our loan portfolio and investments, US $\$ 1,154.5$ million of risk-weighted assets due to market risk requirements, and US\$654.5 million of risk-weighted assets from operational
risk. Our shareholder's equity to total assets ratio was $14.33 \%$ as of December 2021.
In addition to the above-mentioned regulatory capital adequacy requirements, accord 4-2013 issued by the SBP requires all banks to maintain a countercyclical dynamic reserve of not less than $1.25 \%$ and no more than $2.50 \%$ of the riskweighted loans classified as standard loans. The dynamic reserve is presented as part of the legal reserves in the equity section of the Bank's financial statements. The dynamic reserve balance is considered part of the regulatory capital if a bank's regulatory capital exceeds the minimum capital adequacy ratio of $8 \%$. As of December 31, 2021, the Bank's dynamic reserve balance was US $\$ 152.3$ million. On July 21, 2020, the SBP communicated the temporary suspension of the constitution of the dynamic reserve to provide financial relief to banking entities. This suspension applies as of the second quarter of 2020 and will be maintained until the SBP revokes the corresponding resolution (SBP-GJD-00072020). As of December 31, 2021, the Bank has not used the dynamic reserve, which remains at the same level as of December 31, 2019.

In addition, our subsidiaries Banco General (Costa Rica), SA., Banco General (Overseas), Inc. and Commercial Re. Overseas, Ltd. are subject to minimum capital requirements stipulated by: the General Superintendency of Financial Entities (SUGEF), the Monetary Authority of the Cayman Islands (CIMA), and the British Virgin Islands Financial Services Commission, respectively. As of December 31, 2021, all subsidiaries complied with all the minimum capital requirements applicable according to regulations.

As of December 31, 2021, the Bank's net income was US\$408.2 million, which represents an increase of US\$87.0 million, or $27.1 \%$, compared to US $\$ 321.2$ million for December 2020. ROAE and ROAA were $15.25 \%$ and $2.17 \%$, respectively, compared to $12.30 \%$ and $1.68 \%$ for the same period 2020. These results in net income, ROAE and ROAA were mainly due to the following factors:

## Net Interest and Commission Income

The following table presents the Bank's net interest and commission income and related average rate and margin information for the years ended December 31, 2021, 2020 and 2019, respectively:

For the year ended December 31, 2021, our diversified loan portfolio represented $63.2 \%$ of the Bank's total average interest earning assets and generated $83.8 \%$ of the total interest and commissions income.

Total interest and commission income decreased US\$79.0 million, or $7.9 \%$ for the year ended December 31, 2021, due primarily to (i) a $1.6 \%$ decrease in interest-earning assets, and (ii) a 37 basis points decrease in the average interest rate earned.

The 37 basis point decrease in the average interest rate earned on interest-earning assets was primarily due to: (i) a 6 basis point decrease in loans, (ii) a 54 basis point decrease in the interest rate earned on securities and other financial assets, and (iii) a 36 basis point decrease in the interest rate earned on bank deposits.

The following table presents the effect of changes in the Bank's interest and commission income as a result of changes in: (i) the average volume of interest earning assets, and (ii) the average nominal interest rate earned during the years ended 2021, 2020 and 2019:

| Borrowings and placements | 3.62\% | 3.50\% | 4.39\% |  |  |
| Total | 2.14\% | 2.50\% | 2.88\% |  |  |

The Bank's total interest expenses is mainly attributable to interest paid on customer deposits, which represented $82.8 \%$ of the total interest expense for the year ended December 31, 2021, as compared to $77.7 \%$ for the same period in 2020.

The $15.9 \%$ decrease in total interest expenses for 2021, as compared to the same period in 2020, was mainly a result of: (i) a $1.8 \%$ decrease in average interest-bearing liabilities, and (ii) a 36 basis points decrease in the average interest rate paid on interest bearing liabilities.

The decrease in the average interest-bearing liabilities was mainly due to a $36.9 \%$ decrease in average borrowings and placements and a $4.2 \%$ decrease in client's time deposits, partially compensated by a $16.4 \%$ increase in savings and other deposits.

The 36 basis points decrease in the average interest rate paid on interest-bearing liabilities was mainly attributable to: (i) a 33 basis point decrease on the average interest rate paid on client's time deposits, and (ii) a 7 basis point decrease on the average interest rate paid on savings and other deposits.

The following table sets forth the effect of changes in the Bank's total interest expense as a result of changes in: (i) the average volume of interest-bearing liabilities, and (ii) the average nominal interest rates paid:

For the year ended December 31, 2021, the provision charged to expenses, net of recoveries amounted to US\$155.6 million, which represents a decrease of US\$125.3 million or $44.6 \%$ compared to the same period in 2020.

For the year ended December 31, 2021, net write-offs increased US\$9.4 million, from US\$62.3 million in 2020 (or 0.54\% of total loans) to US\$71.7 million (or $0.63 \%$ of total loans).

As a result of the above, the allowance for loan losses increased US $\$ 83.9$ million, from US $\$ 383.8$ million in December 2020 to US $\$ 467.7$ million in December 2021. Consequently, our allowance to total loans ratio increased from $3.35 \%$ in December 2020 to $4.14 \%$ in December 2021, an increase of 79 basis points. Based on our IFRS 9 and our complementary models, we believe that our current allowance for loan losses balance adequately covers the credit risk on the Bank's loan portfolio

## Other Income, Net

The following table presents the information as to the Bank's fees, commission and other income, net for the years ended December 31, 2021, 2020 and 2019, respectively:

|  | As of December 31 |  |  | (\%) Change |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2021 | 2020 | 2019 | 2020/202 | 19/2020 |

| Total of other income, net | 234,872 | 211,063 | 212,143 | 11.3\% | (0.5\%) |

The $11.3 \%$ increase in total other income, net for the year ended December 31, 2021 primarily reflects the following factors:

## Fees and Commission Income, net

The $30.9 \%$ increase in fees and commission income, net of commission expenses for the year ended December 31, 2021, was mainly due to a $35.5 \%$ increase in commissions and fees related to credit and debit card operations, due to higher transaction volumes.

## Insurance Premiums, net

Net insurance premiums decreased by $8.2 \%$ for the year ended December 31, 2021, as compared to the same period in 2020, mainly due to an increase in net claims of US\$3.3 million, partially offset by an increase in net premiums of US\$1.5 million, mainly from the life insurance segment.

## Gain (loss) on Financial Instruments, net

Financial instruments, net for the year ended December 31, 2021, resulted in a gain of US $\$ 8.3$ million, primarily as a result of gains realized from the sale of fixed income investments which benefited from lower rates and a decrease in global credit spreads.

## Other income, net

Other income, net, decreased by US\$1.2 million or $4.0 \%$, in the year ended December 31, 2021, compared to the same period in 2020 primarily mainly due to an additional income received from our credit card business in 2020.

## General and Administrative Expenses

The following table presents the Bank's general and administrative expenses for the years ended December 31, 2021, 2020 and 2019, respectively:

|  | As of December 31 |  |  | (\%) Change |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2021 | 2020 | 2019 | 2020/2021 | 9/2020 |
|  | (in thousands of U.S. dollars, except for percentages) |  |  |  |  |
| Salaries and other employee expenses | 162,629 | 166,278 | 178,977 | (2.2\%) | (7.1\%) |
| Depreciation and amortization expenses | 28,385 | 28,517 | 28,600 | (0.5\%) | (0.3\%) |
| Premises and equipment expenses | 25,119 | 22,727 | 22,316 | 10.5\% | 1.8\% |
| Other expenses | 80,736 | 72,717 | 78,282 | 11.0\% | (7.1\%) |
| Total | 296,869 | 290,239 | 308,175 | 2.3\% | (5.8\%) |

The 2.3\% increase in general and administrative expenses for the year ended December 31, 2021 primarily reflects the following factors:

## Salaries and other employee expenses

Salaries and other employee expenses represented $54.8 \%$ of total general and administrative expenses as of December 31,2021 , as compared to $57.3 \%$ for the same period in 2020 . The $2.2 \%$ decrease in salaries and other expenses was mainly attributable to: (i) a decrease in the number of employees, (ii) the full year effect of voluntary retirements from 2020, partially offset by (iii) an increase in voluntary profit sharing approved by the board of directors.

## Depreciation and Amortization expenses

Total depreciation and amortization expense decreased by $0.5 \%$ for the year ended December 31, 2021.

## Premises and Equipment expenses

Premises and equipment expenses increased by US\$2.4 million or $10.5 \%$ for the year ended December 31, 2021, as compared to the same period in 2020, mainly due to: (i) an increase of US\$2.2 million expense in technological maintenance for improvements in platforms and hardware, and (ii) an increase of US $\$ 0.4$ million in improvements of branches.

## Other expenses

Other expenses increased US $\$ 8.02$ million or $11.03 \%$, for the year ended December 31, 2021, as a result of: (i) a US $\$ 7.0$ million increase in professional services mainly due to transaction volumes of credit cards, and (ii) a US $\$ 0.5$ million increase in public service expenses due to the reopening of branches and offices that were temporarily closed in 2020 due to the pandemic.

## Taxes

Income tax, net amounted to US $\$ 24.8$ million for the year ended December 31, 2021, as compared to a tax credit of US $\$ 14.3$ million for the year ended December 31, 2020. The increase of US $\$ 39.1$ million was primarily due to: (i) higher taxable income as compared to the previous year, and (ii) a decrease of US $\$ 35.7$ million, or $65.5 \%$ in deferred tax.

## Operational Efficiency

The Bank's operational efficiency was $33.65 \%$ in 2021, as compared to $32.94 \%$ in 2020 mainly as a result of: (i) a US\$6.6 million, or $2.3 \%$, increase in the Bank's general and administrative expenses and a (ii) US $\$ 1.0$ million decrease in operating income.
